## **The Principle of Diversity**

### **The Driving Force of Evolution and the Key for Economic Progress**

---

Biological and economical systems have many aspects in common because they follow the same basic principles of evolution. One of the most precious messages from the field of biology is to admire and value the diversity of our planet. 'The Principle of Diversity' is a scientific and philosophical analysis that combines theoretical and practical insights of the phenomena occurring in both, biology and economics. Accordingly, good business administration is only possible with full knowledge of The Magic Triangle of the Economy.
